Profile

I am a Microsoft Dynamics Nav Expert & Developer with 5+ years experience on ERP systems, database configuration and implementation. I am still managing and developing the complete ERP system of an international company and giving my consulting & development services to companies.

Employment History

Partner, Emko Madencilik Ltd.Şti

Jan 2008 — Jan 2016 Çanakkale

I worked in Emko Madencilik Ltd.Şti, a Cat-Litter manufacturer which is a family business, as partner and primary key person for nine years. I was responsible of every step-from mining to dispatching. Produced and exported high-quality cat litters to more than ten different countries, including Northern Europe. Mostly focused on to increase plant capacity, implemented feedback-automated systems, fully automated packing machines for plastic and cartoon bags.

Production Planning Engineer, EMT Controls

Oct 2016 — Dec 2018 İzmir

Responsible for the making planning of production and procurement departments, opening and managing Work Orders, ISSR accuracy and Capacity Utilization, I was the person who is responsible of managing Forecasts, creating reports and workflows. I implemented Kanban and lean manufacturing system to company and responsible to re-calculating Kanban and Safety Stock quantities. I worked with NAV and was lead of ERP transition project to NAV which is completed successfully.

Microsoft Dynamics NAV Developer, ST Consultancy

Jan 2019 — Oct 2019 İstanbul

As a part of development team, i was responsible with developing NAV for new modules for customers which are compatible to work together with Web Applications. Mostly focused on e-invoice, e-waybill modules and implemented few of them successfully.

Microsoft Dynamics NAV Expert & Developer, Black Nova

Oct 2019 — Present Hong Kong

I am currently NAV Expert of Black Nova Co. which based in Hong Kong and a company with worldwide selling network, i am handling Technical and Functional issues of five child companies of group, fully supporting users with issues and developing web applications like online ordering, production tracking, contact registration.
